PERSONAL STATEMENT

AI Senior with expertise in transformers, model fine-tuning, and generative AI. At Nostrum Biodiscovery, I manage, develop and optimize state-of-the-art deep learning models. Passionate about AI-driven innovation, cross-functional collaboration, and cutting-edge research.

EDUCATION

Master in Intelligent Interactive Systems

Universitat Pompeu Fabra

📅 2023

📍 Barcelona, Spain

Bachelor in Physics

Universitat de Barcelona

📅 2020

📍 Barcelona, Spain

Mention in theoretical physics

WORK EXPERIENCE

Nostrum Biodiscovery

Jan 2024 - Present

AI Senior Project Manager

Dec 2025 - Present

- Leading AI and applied science projects in computational drug discovery.
- Managing cross-functional teams (AI engineers, scientists, and stakeholders) to deliver production-ready solutions.
- Acting as the point of contact with clients, overseeing technical communication, progress reporting, and requirement alignment.

Artificial Intelligence Engineer

Jan 2024 - Dec 2025

- Developing and optimizing deep learning models for protein-ligand interaction prediction.
- Researching and implementing transformers and generative AI techniques to enhance model performance.

MSc Machine Learning Lecturer

Universitat Politècnica de Catalunya · Feb 2026 - Present | Part-time

- Teaching laboratory sessions for the Machine Learning course in the Master in Data Science (MDS).
- Covering core ML techniques and hands-on practical implementations.

Business Intelligence Consultant | Data Engineer

Capgemini · Mar 2022 - Dec 2023

- Worked on data integration, transformation, and automation, using PL/SQL, Informatica PowerCenter, and SAP.

AI & ML Intern - Genomics Research

European Joint Research Centre & UPF · Apr 2023 - Jul 2023

- Applied deep learning and machine learning techniques for genomic sequence classification.

BI Consultant | Data Engineer

NTT Data · Jun 2020 - Mar 2022

- Integrated data from Oracle DW to Salesforce using SQL and ETLs.
- Supported predictive modeling tasks by enabling structured data processing and transformation.

SKILLS

Programming & Machine Learning

- **Deep Learning:** PyTorch, TensorFlow, Transformer Models, Generative AI
- **NLP:** BERT, GPT-3/4, Hugging Face Transformers
- **Data Engineering:** SQL, Data Preprocessing, ETL Pipelines
- **Cloud & Deployment:** GCP, AWS

Software

- Informatica PowerCenter, Informatica Cloud, Google Cloud, Salesforce: Sales Cloud, Microsoft Office, LaTeX

Languages

- Spanish (native), Catalan (native), English (fluent, B2 certificate), Italian (beginner)

CERTIFICATES

- Google Cloud - Cloud Digital Leader
- IICS - Cloud Data Integration Partner Bootcamp (Champion Certificate)
